

NICOLE GOH

Software Engineer

Johor Bahru, Johor · +65 9042 7932 · nic.1992@hotmail.com · nicgyc.github.io

Software Engineer with over 8 years of experience building enterprise-grade applications and cloud-native solutions. Proven track record in architecting high-volume backend systems and leading seamless cloud migrations, with deep expertise in C# (.NET) and AWS/Google Cloud infrastructure. Known for bridging full-stack development (ReactJS, NodeJS) with DevOps best practices to deliver scalable, resilient software.

TECHNICAL EXPERTISE

Languages C# (Advanced), VB.NET (Advanced), ASP.NET, SQL, VBA, Java

Cloud & DevOps Google Cloud, AWS Cloud (GCC), Docker, Kubernetes (EKS), Terraform, GitLab, SVN

Databases SQL Server, MySQL, PostgreSQL, DynamoDB, MongoDB, Redis, BigQuery

Web & Integration ReactJS, NodeJS, REST APIs, RabbitMQ, SAP GUI Integration

PROFESSIONAL EXPERIENCE

Full Stack Engineer · Vizzio Technologies Pte Ltd

Sept 2026 - Present

- Develop full-stack digital-twin dashboards using React, TypeScript, Node.js and REST APIs.
- Integrate Unreal Engine, Socket.IO, CCTV/VMS systems, real-time alarms and 360° video playback.
- Optimize media-intensive web interfaces for performance in browsers and embedded Unreal Engine environments.
- Use AI coding agents and reusable agent skills to accelerate development, debugging, testing, refactoring and documentation.
- Collaborate with UI/UX, backend and 3D engineering teams to deliver production-ready solutions.

Software Engineer · Morpheus Consulting Pte Ltd

Jan 2023 – Aug 2026

- Engineer and maintain scalable backend services using C# (.NET) for mission-critical enterprise applications.
- Develop and enhance responsive user interfaces in ReactJS, integrating frontend components with backend APIs to deliver seamless user experiences.
- Design and refine complex SQL Server and MySQL schemas, stored procedures and queries to enhance system responsiveness.
- Lead API development and system integration projects, ensuring high-integrity data flow across distributed services.
- Resolve critical production bottlenecks and system failures, significantly improving uptime in high-data-volume environments.
- Partner with cross-functional teams to translate business requirements into technical enhancements and new features.

Full Stack Developer · Decision Science Agency Pte Ltd

Dec 2021 – Dec 2022

- Developed high-performance web applications using ASP.NET, ReactJS and NodeJS.
- Architected database structures (PostgreSQL, DynamoDB) following rigorous enterprise methodologies.
- Orchestrated containerized environments on AWS (ECS/EKS) and managed Infrastructure as Code via Terraform.
- Deployed comprehensive AWS GCC networking and security features, including VPC, Lambda and CloudFormation.

Process & Software Engineer · MentorMedia Ltd

Apr 2016 – Oct 2021

- Served as technical consultant for in-house process optimization and shopfloor support systems.
- Engineered custom VB.NET and C# solutions automating SAP GUI integrations for vendors and customers.

- Managed hardware-software synergy, overseeing server specifications and industrial hardware support.

Software Engineer · Opspeed Solutions Pte Ltd

Jan 2016 – Apr 2016

- Provided software and server maintenance alongside domain management.
- Customized software to specific customer requirements and managed related hardware support.

Software Engineer & IT Executive · Tomypak Flexible Packaging Sdn Bhd

Jul 2015 – Dec 2015

- Managed full-spectrum IT operations, including ERP (Navision) support and server maintenance.
- Conducted FortiGate firewall investigations and maintained documentation for all corporate IT assets.

EDUCATION

Diploma in Business Application · Republic Polytechnic

2013

Key focus areas: Database Systems (A), Mathematics II (A), Introduction to Programming (B+), Data Communications & Networking (B+).
